**Subject: DSX-5000 CableAnalyzer™**

This letter serves as an approval of the Fluke Networks DSX Series CableAnalyzer™ for use in field-testing of the METZ CONNECT Cat.6/Class E and Cat.6A/ClassEA E-DATmoduls based systems,

METZ CONNECT has evaluated the measurement accuracy of the VERSIV DSX-5000 CableAnalyzer™ with DSX-CHA004S channel adapters and DSX-PLA004S Permanent Link Adapters in the METZ CONNECT GmbH laboratories as well as in field testing.

The test results obtained with this field tester correlate very closely with tests performed with laboratory equipment (Network Analyzer). The DSX Series testers are approved for METZ CONNECT authorized installers and contractors to submit test results for the warranty program.

We look forward to a continued cooperation and future opportunities to evaluate Fluke Networks products that can be used to test and certify our cabling installations in the field.

A handwritten signature in black ink, appearing to read 'R. Dold'.

Sincerely,  
METZ CONNECT GmbH
